    <h1>The Crisis: Drowning in Plastic</h1>
    <p class="alert-box"><strong>Warning:</strong> Every minute, one garbage truck worth
of plastic is dumped into our oceans.</p>
    <p>Plastic has revolutionized our lives, but its durability is now our planet's greatest
threat. Unlike organic materials, plastic does not biodegrade; it
<strong>photodegrades</strong>. This means it breaks down into smaller and smaller pieces
called <em>microplastics</em>, but it never truly disappears.</p>
  </section>

  <section id="problem">
    <h2>Why It Matters</h2>
    <ul>
      <li><strong>Marine Life:</strong> Sea turtles mistake plastic bags for jellyfish, and
seabirds feed microplastics to their chicks, causing starvation and organ failure.</li>
      <li><strong>Human Health:</strong> Microplastics have entered the food chain. They
have been found in tap water, salt, beer, and even human blood.</li>
      <li><strong>Climate Change:</strong> If plastic production were a country, it would
be the world's fifth-largest greenhouse gas emitter.</li>
    </ul>

```

</ul>  
</section>

<section id="solution">

<h2>🔧 The Solution: Interception & Cleanup</h2>

<p>We are moving from a linear economy (make, use, dispose) to a circular economy. Research shows that 80% of ocean plastic comes from just 1,000 rivers.</p>

<div class="solution-grid">

<div class="card">

<h3>1. River Interceptors</h3>

<p>Solar-powered catamarans that extract plastic from rivers before it reaches the sea. A barrier guides waste toward a conveyor belt that lifts trash out of the water.</p>

</div>

<div class="card">

<h3>2. Deep Sea Systems</h3>

<p>For plastic already in the ocean, massive floating barriers use natural currents to catch and concentrate plastic for easy removal and recycling.</p>

</div>

</div>

</section>

<section id="action">

<h2>👉 Your Role: The "Refuse" Revolution</h2>

<p>Technology can clean the mess, but only people can stop creating it.</p>

<h3>The New 3 R's</h3>

<ol>

<li><strong>REFUSE:</strong> Say no to single-use plastics.</li>

<li><strong>REDUCE:</strong> Buy in bulk and choose products with minimal packaging.</li>

<li><strong>REUSE:</strong> Switch to glass, metal, or durable silicone alternatives.</li>

</ol>

<blockquote>

<strong>Did You Know?</strong><br>

Bringing your own reusable water bottle can save an average of 156 plastic bottles annually per person.
